

# The 3 + 6 Quarterly/Monthly Look-Ahead Spread

Deal three, six, nine or twelve-card numbered sets and the corresponding monthly cards  
 Each quarterly period involves four zodiacal signs beginning on the 20<sup>st</sup> - 21<sup>st</sup> of each month.

(For example, First Quarter - Jan/Feb/Mar - involves part or all of ♈, ♎, ♋ and ♏)

January is 2/3 ♈ and 1/3 ♎, February is 2/3 ♎ and 1/3 ♋, and so forth

1. Each numbered card represents one month of the calendar year (three cards per quarter).
2. Each zodiacal card represents part of one calendar month (two cards per month).
3. Read the numbered series as the “tone” of the selected period.
4. Read the zodiacal cards as monthly “snapshots” showing more detail within that period.
5. This spread can be read in quarterly/monthly increments or as semi-annual/annual.
6. The four quarterly periods run from January through December.
7. The twelve zodiacal periods follow the seasonal equinoxes and solstices.
8. Align the quarters and the monthly increments accordingly: 1Q = ♈ - ♏ etc.
9. A typical quarterly look-ahead will involve 9 cards – three quarterly cards and 6 zodiacal cards. Each quarter added will double that number, for a maximum of 36 cards. It is also possible to read a single monthly card and two zodiacal cards as a 3-card set.
