

The “Do It Yourself” Outcome Probability Spread

1. Shuffle, cut and deal the first four cards, placing the rest of the deck face-down to the right.
2. Read these four cards as Foundation, Recent Past, Present and Near Future.
3. Go through the rest of the pack, keeping the cards in order, and find the outcome card you think is most likely or most desirable. If the card you want was dealt into the spread, that energy is already at work in the matter; choose again. If your card is at the top or bottom of the reserved pack, shuffle the remainder of the cards again and find the outcome card.
4. Take the chosen card, the two cards before and the two cards after out of the deck as a five-card series and place them below the first line.
5. Using Elemental Dignities with the chosen card as the “principal” or focus card, determine how likely the chosen outcome is to appear. Three sets of EDs are available. First, determine the relative strength or weakness of the Card Before and the Card After. Then apply those adjusted qualities to the central ED. If the Focus Card is strengthened by good dignity, consider the outcome likely. If it is weakened by ill-dignity, consider it unlikely. If it is of mixed dignity, make your own decision on relative probability or flip a coin.
